BY MEDIA EVENTS

Prague-based AV MEDIA EVENTS is a leader in presentation, projection and audiovisual technology. It sets trends in event technologies, hybrid and virtual conferences and scenography.

The company offers clients a complete turnkey service: from the initial creative concept and 3D visualization to the actual implementation, professional handling and evaluation of the event.

Thanks to an extensive fleet of top-notch equipment, state-of-the-art LED walls, studio technology and its own team of specialists, AV MEDIA EVENTS can seamlessly handle even the most demanding international congresses with several thousand participants.

KONFES

The KONFES congress equipment company is one of the proven Prague suppliers of specialized technical equipment for international congresses, professional symposia, conferences and training courses.

Its main domain is modern interpreting and discussion technology - it has digital, wireless conference systems. In addition to interpreting booths and microphone sets, it also provides complete sound, lighting, projection and display technology and the implementation of hybrid or online streaming events.

Thanks to its narrow specialization in the congress segment, KONFES offers a high level of reliability and professional technical support.

Audiolight Service

The Prague company Audiolight Service is one of the leading Czech suppliers of professional audio-visual and lighting equipment with more than twenty years of tradition on the market.

It specializes in the complete technical production of demanding international conferences, press conferences, fashion shows, social galas and large-scale outdoor events. Its strength lies in the combination of top-notch audio and visual equipment with an emphasis on aesthetics, spatial architecture and creative lighting design.

Audiolight Service offers clients full support from the 3D design and technical concept phase to precise on-site handling, both in modern congress centers and in demanding historical spaces.

Česká umělecká agentura

Česká umělecká agentura is a Karlovy Vary event and production company with more than 25 years of experience. It ensures the complete implementation of cultural, social and corporate events - from the program and production to professional technical support.

Technical event management The agency offers sound, stage lighting, video projection, LED screens, camera transmissions, streaming, stages and special effects. For larger events, it has, among other things, the L-Acoustics KARA II system, which it lists as a festival setup designed for approximately 800–2,000 people.

Experience and implementations Among the presented implementations are, for example, In the Rhythm of the Film Festival, Karlovy Vary Cultural Summer, Karlovy Vary Christmas Markets or Czech Street Party in Brussels, which the agency describes as the largest Czech event in Brussels. The company thus combines technical support with complete production and organization of events.

Fa OBRUSNIK

For an event, it's good to have a technical partner who understands not only the technology, but also the space, program, and number of people.

Fa OBRUSNIK from Ostrava focuses on sound systems, rental of sound and lighting equipment, and technical support for events and can provide sound for events for up to approximately 1,000 people.

Fa OBRUSNIK works with professional sound equipment KV2 Audio and Midas PRO mixing consoles and also offers lighting equipment. An important part of their offer is the ability to adjust the sound performance according to the specific space and nature of the event.

For clients, this means that they do not have to choose the technology "off the table", but can consult the solution according to the actual needs of the event. The company offers both the sound system for events and the rental of technology. In addition to technical support, it also provides photographic services.

Igor Šivic - Personal solutions to your requirements

Sometimes you don't need a large production agency, but a person who knows what they're doing, who will come, advise, and personally solve the technical issues on site.

Mr. Igor Šivic from Frýdek-Místek has been involved in the technical provision of events since the early 1990s.
His business is built on a personal approach.

In addition to technical services, it also deals with audio equipment and its sales, offering, for example, microphones, microphone ports, mixing consoles, loudspeakers and other sound equipment.

Mr. Šivic's services are particularly suitable for smaller and medium-sized corporate, social or cultural events where flexibility and individual arrangements are important.

And sometimes it's just nice to have a specific person on the other end of the phone, not an entire "call center".

BB Group Agency

BB Group Agency from Český Těšín is a Czech-Polish team specializing in the technical provision of cultural, social and sporting events.

Their approach is based on the technical design of the event before the actual implementation, the services include 3D design, technical documentation and pre-programming of the technology. The company has its own professional equipment for sound, lights, video and stage and also focuses on safe construction and rigging solutions.

Their Czech-Polish cross-border experience is interesting, which can also be an advantage in events with international reach.

In addition to technical support, it offers turnkey events, i.e. complete production from technical solutions to final implementation.

For the client, this means one partner who can connect the technology, the stage, the image and the production itself.

VAC Production

VAC Production is not a newcomer who is just learning what technical event management entails. The agency was founded in 1988...

For event organizers, the combination of an experienced team, in-house technology, and the ability to handle multiple parts of the event with one partner is especially interesting.
From a small event to a large production, VAC Production's portfolio includes sound systems, lighting, covered stages, LED screens, and a complete production service.

He also has experience with sound systems for large orchestras and open-air concerts. In the field of sound, he works with JBL VTX and KV2 Audio systems, and for lighting, he uses, among others, ROBE, GLP, MA and CHAMSYS technology.

It also has its own structures for covering stages and LED screens, including the necessary clamping and hanging equipment.

What is especially important for the client is that they do not have to assemble a technical solution from several different suppliers: VAC Production can cover sound, light, image and stage as a single unit.

For conference and international events, the offer of interpreting equipment, including closed interpreting booths, is also interesting. The advantage is its own warehouse in Pilsen and the possibility of not only renting equipment, but also ensuring its transport, installation and technical implementation.

In addition, the range ranges from smaller corporate events and conferences to large-scale events and festivals for thousands of participants. For MICE, the combination of technology, furniture and other event equipment within a single supplier is particularly attractive - from conference microphones and projections to LED walls, to stages, tent facilities or equipment for the outdoor part of the program. The specific range can be adapted to the type and size of the event.

Junesta

Professional technical facilities for concerts, festivals and corporate events. Rental of stage equipment, sound and lighting with the possibility of comprehensive technical support for events of various sizes.

Junesta s.r.o. is a Pilsen production company that, in addition to organizing concerts, festivals and cultural events, has extensive technical facilities for their implementation. The offer includes professional sound systems, lighting equipment, stage systems, mobile stages and covered stage structures of the ground support type. For the construction of stages, dance floors, stands and ramps, it uses the NIVTEC modular system, which allows you to adapt the resulting solution to the space and the required height. Stagemobil mobile stages in L and XL versions are also available. A significant advantage is the connection of technical equipment with its own production and implementation team, which has experience in preparing large-scale cultural projects.

Junesta's technical facilities are particularly suitable for concerts, festivals, city celebrations, corporate social events and outdoor events, where, in addition to high-quality sound and lighting, a safe and variable stage solution is also important. The company participates in projects throughout the Czech Republic and has been managing the Lochotín Amphitheater in Pilsen since 2020, with a declared maximum capacity of 17,000 visitors. This experience demonstrates its focus on large-scale productions; the specific scope of technical equipment always depends on the requirements of the individual event.

M-AUDIO

Compact technical solutions from sound and lighting to LED screens and projection to mobile and covered stages.

M-AUDIO is an established regional supplier with a strong technical background and a wide portfolio of its own equipment. It offers rental of sound and lighting equipment, LED screens, video projection, stage equipment and covered mobile stages, supplemented by technical service. The range can be used for conferences, company presentations and social events as well as for concerts, festivals, city celebrations or sporting events. The company has its own operational background and technical team, so it can deal with multiple technical areas within one order.

Its strength is the ability to adapt technical solutions to very different spaces and event formats - from conference halls, hotels and cultural monuments to stadiums, outdoor areas and large festival areas. In addition to standard sound and lighting, it also offers video projection, LED screens, lasers and other special effects. This makes it an interesting partner for events where, in addition to conference technology, it is also necessary to solve the scenography and the more production-intensive part of the program.

RN Production

Sound, lights and stages for events for up to 3,500 visitors. Own professional equipment and an experienced team for corporate events, concerts, festivals and large outdoor productions.

RN Produkce specializes in professional sound, lighting and stage equipment and, in addition to the rental itself, offers complete technical support for events. Its own technical park includes professional RCF line-array systems, subwoofers, stage monitors, Allen & Heath digital mixing consoles, ChamSys lighting, construction and other equipment. Technical service, installation, dismantling and, depending on the nature of the event, complete technical supervision are also available.

The company's profile is particularly suitable for productions where high-quality sound and lighting atmosphere play a crucial role. The technical solution covers smaller corporate events and presentations, balls and social evenings as well as concerts, festivals, city celebrations and large outdoor productions. It realizes more than 150 events per year; for large productions, it uses, for example, its own 45kW line-array system and an extensive lighting park.

STANY ZA HUBIČKU

Mobile facilities for corporate events, teambuildings, celebrations and other outdoor programs for dozens to hundreds of guests.

Tents for a small fee complement classic AV suppliers with an area that is often as important for outdoor MICE events as the technology itself. The regional rental company focuses on party and scissor tents and related equipment; the offer includes, for example, beer sets, tables, lighting and other elements needed to create a temporary event environment. The advantage is that assembly and disassembly are provided, so the supplier can take over the practical part of preparing the space directly on site.

For MICE, the variability of the solution is particularly interesting - from a smaller roof for catering, registration or accompanying program to a larger set-up for the main part of the outdoor event. The DUO package consisting of two 6 × 10 m tents offers a capacity of up to 200 people, smaller scissor tents are suitable for catering, bar, DJ or band facilities, for example.

Verified suppliers of not only AV equipment

AVT Group

Design, installation and service of audiovisual equipment from the team responsible for the sound of the largest Czech stages.

AVT Group is one of the most prominent Czech companies in the field of sound and lighting system design. It began to build its reputation at the turn of the millennium and today designs for theaters, sports halls and large technical buildings such as train stations and airports.

For conference and corporate event organizers, this is a guarantee that the technology will not just be "installed", but thoughtfully designed for a specific space. The company provides the entire process from the first design through installation to warranty and post-warranty service. It also offers technology rental, so you can rely on it even for one-off events.

The reliability of the company is also confirmed by orders for demanding clients. The AVT Group team is proud of a number of successfully completed public contracts, including the implementation of lighting and sound technology in the O2 Arena in Prague, the implementation of sound systems for the Eden and Sparta Praha stadiums. They also integrated the most modern AV technologies into the multi-genre space of Nové Spirály, which meet the high demands for stage and event operations. In the past, the company provided project documentation for audiovisual technology for, for example, Masaryk University in Brno or the Faculty of Physical Education and Sport of Charles University in Prague.

Agentura devět měsíců

If you are looking for a partner for the technical support of a corporate event, conference or social evening, the Nine Months Agency offers comprehensive event services including audiovisual equipment rental.

The Zlín agency provides turnkey corporate events and, in addition to production support, also offers its own audiovisual equipment. This includes sound, lighting, projection technology, stages and other equipment necessary for a professional event. By combining technical support with event production, the agency can prepare a solution according to the nature and scope of a specific event - from corporate parties and conferences to larger social and representative events.

The advantage is the possibility of providing the technology and other parts of the production through one partner. The agency focuses on corporate clients and, depending on the assignment, can provide complete organization of the event, including technical support, program and production.

IS production

IS Produkce combines its own technical background with a professional team for image, sound, video and live broadcasts. In addition to film and advertising production, it also offers live streaming, corporate videos and equipment rental.

If you want to add high-quality video, sound or live broadcast to your corporate event, IS Produkce offers technical and production support based on experience in film and advertising production. The Zlín-based company is one of the established audiovisual production companies in Moravia and works with its own team and equipment.

For corporate clients, it provides, for example, live camera transmissions and live streaming, production of presentation and corporate videos, or technical production of audiovisual content. For live broadcasts, it can ensure the entire process from script design and dramaturgy, through stage design and necessary technology, to the actual implementation under the guidance of an experienced director.

It implements smaller online events, webinars or press conferences as separate production projects, but is also prepared for more technically demanding formats. A significant advantage is its own technical and personnel facilities. IS Produkce has production, video and audio post-production, casting, location service and film equipment rental under one roof. In Zlín, it also uses the facilities of film studios, including its own studios.

Backstage Agency

For events where quality technical support is one of the key elements of success, Backstage Agency offers a wide range of its own equipment for sound, lighting and stage. The Zlín-based event agency operates throughout the Czech Republic and Slovakia and has implemented hundreds of projects in more than 15 years of experience.

The offer includes professional sound systems including line array sets, various types of stage and effect lighting, LED screens or stage construction. The equipment can be rented separately, or the agency will provide complete installation and operation. For more complex audiovisual projects, it prepares a solution according to the specific space and requirements of the event.

Backstage Agency is not just a technical supplier. It combines its own equipment with complete event production - from providing stage and technology, through catering and mobile bars, to booking artists and implementing turnkey corporate events. It also has experience with large public events and festivals, which allows it to work with projects of various scales.
